County Ranking by Average Weekly Wages	293

INTRODUCTION

Background

The primary purpose of this publication is to provide annual data on covered employment, total and taxable wages, premiums due, and average premium rates. Primary users include public and private researchers, governments, educational institutions, and labor organizations.

The publication contains county summaries of employment and wages by industry for firms covered by unemployment insurance during the reported period. A summary of the state as a whole is also included. The statistics were compiled from quarterly contribution and wage reports submitted to the Tennessee Department of Employment Security by employers subject to the Tennessee Employment Security Law.

As in past publications, editing was necessary in order to comply with federal and state regulations regarding disclosure of individual firm data. These regulations state that "Data will not be disclosed for any data record (firm), or for levels summarized from individual data records (such as summarized industry level data), that has fewer than three reporting units." If there are three or more reporting units, data are withheld if one unit accounts for 80% or more of employment.

Significant Format Changes for 1986-1987 Publication

Beginning with the data published for 1986 significant changes were made in the format for each county. These changes, which are listed below, may create a "break" in covered employment and wages series published since 1970.

1. The number of reporting units criteria was changed from currently active to active during the year.

2. All two-digit Standard Industrial Classification (SIC) code titles are printed for each county.

3. The regulations pertaining to nondisclosure of individual firm data were more strictly adhered to.

4. An "Other" category was created at the end of each geographic area's printout to collect all unpublishable data.

The change in the total number of units will increase the number of units by approximately 10,000 units. More strick adherence to nondisclosure regulations and the creation of an "others" category at the end of each county will force some two-digit industry data to be dropped and moved into "others". In some cases entire industry subdivisions and divisions will be moved to "others". Division totals which are published may also be reduced since the total for a particular industry within the division was moved to the "others" category.

Description of Tables and Report Layout

Shown in the first three columns of the tables are the number of reporting units (employers). The annual average employment, and the total wages paid in each industry during the calendar year. The total wage figure was divided by annual average employment to obtain the annual average wage in column four. Annual average wage was divided by 52 to derive average weekly wage in column five. The final three columns consist of taxable wages, total premiums due, and the average preimum rate.

State totals for all industries are presented in the first table, "Statewide", followed by county breakdowns. County "000", the first county presented, is composed of data from firm's operating in Tennessee but having no established address, or having units in more than one county.

Multiunit employers file a single report covering all of their establishments in the state. The data for such establishments are presented either in the county with the largest employment or in county "000" depending on how the employer chooses to report. Additional breakdowns of multi-establishment employers into appropriate counties are added each year.

1986

INTRODUCTION

Background

The primary purpose of this publication is to provide annual data on covered employment, total and taxable wages, premiums due, and average premium rates. Primary users include public and private researchers, governments, educational institutions, and labor organizations.

The publication contains county summaries of employment and wages by industry for firms covered by unemployment insurance during the reported period. A state summary is also included. The statistics were compiled from quarterly contribution and wage reports submitted to the Tennessee Department of Employment Security by employers subject to the Tennessee Employment Security Law.

As in past publications, editing was necessary in order to comply with federal and state regulations regarding disclosure of individual firm data. These regulations state that "data will not be disclosed for any data record (firm), or for levels summarized from individual data records (such as summarized industry level data), that have fewer than three reporting units." If there are three or more reporting units, data are withheld if one unit accounts for 80% or more of employment.

Description of Tables and Report Layout

Shown in the first three columns of the tables are the number of reporting units (employers), the annual average employment, and the total wages paid in each industry during the calendar year. The total wage figure was divided by the annual average employment to obtain the annual average wage in column four. The annual average wage was divided by 52 to derive the average weekly wage in column five. The final three columns consist of taxable wages, total premiums due, and the average premium rate.

State totals for all industries are presented in the first table, "Statewide", followed by county breakdowns. County "000," the first county presented, is composed of data from firms operating in Tennessee but having no established address or having units in more than one county.

Multiunit employers file a single report covering all of their establishments in the state. The data for such establishments are presented either in the county with the largest employment or in county "000," depending on how the employer chooses to report. Additional breakdowns of multiestablishment employers into appropriate counties are added each year.
